SUMMARY

Computer Engineering graduate with hands-on experience building and deploying full-stack web applications using JavaScript, TypeScript, React.js, Next.js, Node.js, Express.js, PostgreSQL, and MongoDB. Built projects involving REST APIs, authentication, database integration, role-based access, and cloud deployment. Comfortable working across frontend and backend development, debugging application flows, and learning new technologies through practical implementation.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Databases: PostgreSQL, MongoDB, MySQL

Database Tools: TypeORM, Knex, Mongoose

Authentication & Security: JWT, Google Sign-In, bcrypt, Role-Based Access Control, Rate Limiting

Tools & Platforms: Git, GitHub, Postman, Swagger, Vercel, Render, MongoDB Atlas, Neon

Core Concepts: Client–Server Architecture, REST API Design, CRUD Operations, Database Relationships, API Integration

PROJECTS

GrowHabits – Child Routine & Habit Planning App | [GitHub](#) | [Live Demo](#)

Tech Stack: Next.js, TypeScript, Tailwind CSS, TypeORM, PostgreSQL

- Built a full-stack planner application for creating and managing personalized routines across different age groups.
- Implemented account-based planner storage, guest access, and printable planner output using browser print-to-PDF.
- Added authentication features including JWT-based login, Google Sign-In, email verification, and password reset.
- Used TypeORM with PostgreSQL to define and manage application data and relationships.

Ocula — Face Detection & Privacy Blur Web App | [GitHub](#) | [Live Demo](#)

Tech Stack: React.js, Node.js, Express.js, PostgreSQL, Knex, face-api.js

- Built a full-stack web application for face detection, age/gender/expression analysis, selective face blurring, and anonymized image export.
- Supported both uploaded images and image URLs for analysis.
- Added authentication, guest access, role-based admin functionality, and API rate limiting.
- Built and documented REST APIs and used Knex for PostgreSQL database operations and scan-history storage.

MunchPlan — Personalized Nutrition & Meal Planning App | [GitHub](#) | [Live Demo](#)

Tech Stack: React.js, Express.js, MongoDB Atlas, Node.js, JWT, Tailwind CSS

- Built a full-stack meal-planning application that generates recommendations using calorie targets and cosine-similarity scoring.
- Implemented daily food and macronutrient tracking, meal history, and calendar-based progress views.
- Added JWT authentication, Google Sign-In, and guest mode with session-based storage.
- Used MongoDB Atlas for profile, meal-plan, and tracking data.

EDUCATION

B.E. Computer Engineering

2022–2025

Sinhgad Institute of Technology (Pune University, Maharashtra)

CGPA: 8.43

CERTIFICATIONS

- [Microsoft Certified: Azure Fundamentals \(AZ-900\)](#)
- [NPTEL – Data Structures and Algorithms using Java \(IIT Kharagpur\)](#)
- [NPTEL – Data Analytics using Python \(IIT Roorkee\)](#)
