SUMMARY

Computer Engineering graduate with hands-on experience building and deploying full-stack web applications using JavaScript, TypeScript, React.js, Next.js, Node.js, Express.js, PostgreSQL, and MongoDB. Built projects involving REST APIs, authentication, database integration, role-based access control, and cloud deployment. Comfortable working across frontend and backend development, debugging application flows, and using AI-assisted development tools such as ChatGPT, Codex, and GitHub Copilot for coding support, debugging, documentation, and learning.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Databases: PostgreSQL, MongoDB, MySQL

Database Tools: TypeORM, Knex, Mongoose

Authentication & Security: JWT, Google Sign-In, bcrypt, Role-Based Access Control, Rate Limiting

AI-Assisted Development: ChatGPT, Codex, GitHub Copilot

Tools & Platforms: Git, GitHub, Postman, Swagger, Vercel, Render, MongoDB Atlas, Neon

Core Concepts: Client–Server Architecture, REST API Design, CRUD Operations, Database Relationships, API Integration

PROJECTS

GrowHabits – Child Routine & Habit Planning App | [GitHub](#) | [Live Demo](#)

Tech Stack: Next.js, TypeScript, Tailwind CSS, TypeORM, PostgreSQL

- Built a full-stack application for parents to create personalized monthly routines with customizable daily activities.
- Implemented account-based planner storage, session-based guest access, and printable planners with browser PDF export.
- Integrated JWT-based authentication, Google Sign-In, email verification, and password recovery.

Ocula — Face Detection & Privacy Blur Web App | [GitHub](#) | [Live Demo](#)

Tech Stack: React.js, Node.js, Express.js, PostgreSQL, Knex, face-api.js

- Built a full-stack app that detects faces in uploaded images or image URLs, estimates age/gender/expression, and supports selective face blurring before export.
- Implemented authentication with email/password, Google Sign-In, JWT sessions, email verification, password reset, and guest access.
- Built Express REST APIs with PostgreSQL/Knex for user profiles, scan history, image-count tracking, protected routes, and basic admin management.

MunchPlan — Personalized Nutrition & Meal Planning App | [GitHub](#) | [Live Demo](#)

Tech Stack: React.js, Express.js, MongoDB Atlas, Node.js, JWT, Tailwind CSS

- Built a full-stack meal-planning app with food suggestions based on dietary preferences, estimated calorie targets, and user ratings.
- Implemented food-consumption tracking, planned-versus-consumed nutrient summaries, and calendar-based meal history.
- Integrated email/password and Google sign-in, email verification, password recovery, and account linking that preserves existing user data.
- Added browser-session guest mode and automated tests covering authentication, account linking, onboarding, and profile updates.

EDUCATION

B.E. Computer Engineering

2022–2025

Sinhgad Institute of Technology (Pune University, Maharashtra)

CGPA: 8.43

CERTIFICATIONS

- [Microsoft Certified: Azure Fundamentals \(AZ-900\)](#)

- [NPTEL – Data Structures and Algorithms using Java \(IIT Kharagpur\)](#)
- [NPTEL – Data Analytics using Python \(IIT Roorkee\)](#)
