SUMMARY

Computer Engineering graduate (CGPA: 8.43) with hands-on experience building and deploying full-stack web applications end-to-end using React.js, Next.js, Node.js, Express.js, MongoDB, and PostgreSQL. Experienced implementing production-grade authentication flows — JWT, Google OAuth, email verification, and password reset — alongside role-based access control, API rate limiting, and REST API documentation. Comfortable across the stack, from relational/NoSQL schema design to responsive React interfaces and cloud deployment. Passionate about writing clean, maintainable code and continuously learning modern web technologies.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, Knex, TypeORM, Middleware Design

Databases: PostgreSQL, MongoDB (Mongoose), MySQL

Authentication & Security: JWT, Google OAuth, bcrypt, Role-Based Access Control (RBAC), Rate Limiting

Tools & Platforms: Git, GitHub, Postman, Swagger, Vercel, Render, MongoDB Atlas, Neon

Concepts: MVC Architecture, RESTful API Design, Database Modeling, Client–Server Architecture

PROJECTS

GrowHabits – Family Habit Planner | [GitHub](#) | [Live Demo](#)

Tech Stack: Next.js, TypeScript, Tailwind CSS, TypeORM, PostgreSQL

- Built a full-stack planner app with age-group-based routine customization, account-based storage, guest mode, and printable planner output via browser print-to-PDF.
- Implemented secure authentication with JWT, Google Sign-In, email verification, and password reset; designed PostgreSQL entities via TypeORM.

Ocula — Face Detection & Privacy Blur Web App | [GitHub](#) | [Live Demo](#)

Tech Stack: React.js, Node.js, Express.js, PostgreSQL, Knex, face-api.js

- Built a full-stack face detection app with age/gender/expression analysis, selective face blurring, and anonymized image export, supporting both URL and file upload input.
- Implemented secure authentication (JWT, Google Sign-In, email verification, password reset, guest access), role-based admin functionality, and API rate limiting.
- Designed REST APIs with Swagger documentation and scan history, using Knex for PostgreSQL query building.

MunchPlan — Personalized Nutrition & Meal Planning App | [GitHub](#) | [Live Demo](#)

Tech Stack: React.js, Express.js, MongoDB Atlas, Node.js, JWT, Tailwind CSS

- Built a full-stack meal planning app with profile-based meal-plan generation using calorie targets and cosine-similarity recommendation scoring.
- Implemented daily food/macronutrient tracking, meal history, and calendar-based progress dashboards.
- Added JWT authentication with Google Sign-In and guest mode with session-based storage.

EDUCATION

B.E. Computer Engineering

2022–2025

Sinhgad Institute of Technology (Pune University, Maharashtra) | CGPA: 8.43

CERTIFICATIONS

- [Microsoft Certified: Azure Fundamentals \(AZ-900\)](#)
- [NPTEL – Data Structures and Algorithms using Java \(IIT Kharagpur\)](#)
- [NPTEL – Data Analytics using Python \(IIT Roorkee\)](#)
